Reaching the right audience

Geographic targeting

We support geo-targeting to the country level. This allows you to target your messages to specific countries of interest, or exclude a set of countries that aren't relevant to your ads.

In the USA, we also support targeting by state although this can cause prices to vary.

Content (keyword) targeting

You can also target to specific content such as programming languages, specific technologies or frameworks, or topics of interest such as security, web development, or devops.

Our publisher network

The EthicalAds network is made up of about 50 different developer-focused sites including our own site Read the Docs

[Read the Docs](#)

We got our start showing ads on Read the Docs which is a site for hosting open source software documentation.

Read the Docs hosts docs for thousands of open source projects.

[JSBin](#)

JSBin is a tool for experimenting with web languages like HTML, CSS, and JavaScript.

If your target audience is frontend web development, your ads will on JSBin and similar sites.

[Flask](#)

Flask is a backend web framework built in Python.

If you your advertising focus is backend web development, your ads will show on Flask's documentation among other high quality sites.

Reporting & Metrics

After becoming an advertiser, you will get a login to a reporting interface to see the live status of your running campaigns.

You can compare different ads in order to optimize the performance of your campaign.

You can also see the top performing geos and publishers where your ad appears.

Ad specifications

Text & Image advertisements

- Images: 240*180px (displayed at 120*90)
- Text: Up to 100 characters
- Images are shown near the text, either above or beside it, depending on the design of the publisher's site
- Copy can be selective italicized or bolded
- Ads can also be shown as text-only ads if you opt into that, increasing distribution among our publisher network.
- For a live example, see <https://flask.palletsprojects.com/>

Sidebar ad

Ad specifications

Text-only advertisements (no image)

- Text-only ads can show at the bottom of the page and scroll when the user scrolls for maximum visibility.
- Text ads can also be integrated into the main content of the site, appearing above the primary content of the page.
- Text requirements are exactly the same as the sidebar ads (up to 100 characters) so the same copy can be used.
- For a live example, see <https://jsbin.com>
